 We're proud to join @WaterSafeUK's lead-free solder campaign and have taken a pledge to only carry and use lead-free solder to protect customers from lead in their drinking water. Find out more: www.watersafe.org.uk/lead-free-pledge. #LeadFreeSolder

Facebook

 Exciting news! We've pledged to only carry and use lead free solder as part of @WaterSafeRegister's lead-free solder campaign.

Lead in drinking water can cause serious health issues, especially for children so we're taking action to protect customers from potentially serious health effects.

📣 We've joined @WaterSafe's lead-free solder campaign, pledging to only carry and use lead-free solder.

Lead in drinking water can cause serious health issues, especially for children, and its use in drinking water is illegal.

Despite this, a WaterSafe survey showed two thirds of plumbers still carry lead solder in their toolkit, leading to a risk of lead solder being used accidentally in plumbing carrying drinking water.

We're supporting WaterSafe's campaign to avoid contamination and protect customers from potentially serious health effects.
